Journal of Sedimentary Petrology

INDEX TO VOLUME 2

	No.	Page
Beach, calcareous, on the coast of Maine, Percy E. Raymond and H. C. Stetson	(2)	51
Calcareous, at John O'Groats, Scotland, Percy E. Raymond and Forbes Hutchins	(2)	63
Beach sands, a textural variation series of, from Cedar Point, Ohio, F. J. Pettijohn and J. D. Ridge	(2)	76
Broughton, M. N., Texas fuller's earths	(3)	135
Burt, Frederick A., Formative processes in concretions formed about fossils as nuclei	(1)	38
Cellophane as a slide cover, A. C. Tester	(2)	125
Colony, R. J., Source of the sands on the south shore of Long Island and the coast of New Jersey	(3)	150
Committee for the study of accessory minerals of igneous and sedimentary rocks	(2)	125
Concretions formed about fossils as nuclei, formative processes in, Frederick A. Burt	(1)	38
Detrital grains of minute size, a simple device for the manipulation of, Arthur D. Howard	(3)	160
Edelmann, C. H., The occurrence of moissanite (silicon carbide) in sediments	(1)	48
Eocene, Formative processes in concretions formed about fossils as nuclei from, Frederick A. Burt	(1)	38
Fine-grained sediments, mechanical analysis of, W. C. Krumbein	(3)	140
Fuller's earths of Texas, M. N. Broughton	(3)	135
Galliher, E. Wayne, Organic structures in sediments	(1)	46
Gee, Haldane, Inorganic marine limestone	(3)	162
Glacio-lacustrine sediments reworked by running water, George A. Thiel	(2)	68
Hough, J. L., Suggestion regarding the origin of rock bottom areas in Massachusetts Bay	(2)	131
Howard, Arthur D., A simple device for the manipulation of individual detrital grains of minute size	(3)	160
Hutchins, Forbes, with Raymond, Percy E., A calcareous beach at John O'Groats, Scotland	(2)	63
Inorganic marine limestone, Haldane Gee	(3)	162
Krumbein, W. C., A history of the principles and methods of mechanical analysis	(2)	89
The mechanical analysis of fine-grained sediments	(3)	140
Limestone, inorganic marine, Haldane Gee	(3)	162
Long Island, source of the sands on the south shore of, R. J. Colony	(3)	150
Maine, a calcareous beach on the coast of, Percy E. Raymond and H. C. Stetson	(2)	51
Manipulation of individual detrital grains of minute size, a simple device for, Arthur D. Howard	(3)	150
Massachusetts Bay, sedimentation in, A. C. Trowbridge and F. P. Shepard	(1)	3
Massachusetts Bay, suggestion regarding the origin of rock bottom areas in, J. L. Hough	(2)	131
Mechanical analysis, a history of the principles and methods of, W. C. Krumbein	(2)	89
Mechanical analysis of fine-grained sediments, W. C. Krumbein	(3)	140
Minnesota, glacio-lacustrine sediments reworked by running water, George A. Thiel	(2)	68
Moissanite (silicon carbide), the occurrence of in sediments, C. H. Edelmann	(1)	48
New Jersey, source of the sands on the coast of, R. J. Colony	(3)	150
Ohio, Cedar Point, a textural variation series of beach sands from, F. J. Pettijohn and J. D. Ridge	(2)	76
Organic structures in sediments, E. Wayne Galliher	(1)	46

	No.	Page
Pettijohn, F. J., with Ridge, J. D., A textural variation series of beach sands from Cedar Point, Ohio	(2)	76
Principles and methods of mechanical analysis, history of, W. C. Krumbein	(2)	89
Raymond, Percy E., with Stetson, H. C., A calcareous beach on the coast of Maine	(2)	51
with Hutchins, Forbes, A calcareous beach at John O'Groats, Scotland	(2)	63
Reviews and new publications	(2)	127; (3) 167
Reworked glacio-lacustrine sediments by running water, George A. Thiel	(2)	68
Ridge, J. D., with Pettijohn, F. J., A textural variation series of beach sands from Cedar Point, Ohio	(2)	76
Rock bottom areas in Massachusetts Bay, suggestion regarding the origin of, J. L. Hough	(2)	131
Sands on the south shore of Long Island and the coast of New Jersey, source of, R. J. Colony	(3)	150
Scotland, a calcareous beach at John O'Groats, Percy E. Raymond and Forbes Hutchins	(2)	63
Sedimentation in Massachusetts Bay, A. C. Trowbridge and F. P. Shepard	(1)	3
Sediments, organic structures in, E. Wayne Galliher	(1)	46
The occurrence of moissanite (silicon carbide) in, C. H. Edelmann	(1)	48
Shepard, F. P., with Trowbridge, A. C., Sedimentation in Massachusetts Bay	(1)	3
Slide cover, cellophane as, A. C. Tester	(2)	125
Stetson, H. C., with Raymond, Percy E., A calcareous beach on the coast of Maine	(2)	51
Tester, A. C., Cellophane as a slide cover	(2)	125
Texas, Brazos county, Formative processes in concretions formed about fossils as nuclei, Frederick A. Burt	(1)	38
Texas fuller's earths, M. N. Broughton	(3)	135
Textural variation series of beach sands from Cedar Point, Ohio, F. J. Pettijohn and J. D. Ridge	(2)	76
Thiel, George A., Glacio-lacustrine sediments reworked by running water	(2)	68
Trowbridge, A. C., with Shepard, F. P., Sedimentation in Massachusetts Bay	(1)	3
